

Research and Clinical Trials Excellence Plan 2024–2029

Strategic vision

Striving for excellence and innovation in research and clinical trials to enhance health care provision to and with the communities of Far North Queensland.

Research priorities

- Aboriginal and Torres Strait Islander health
- Tropical health and medicine
- Health service research
- Equity of access to health care

Enhance partnerships	Enhance research support and engagement	Excellence in research ethics and governance	Expansion of research activities	Engagement with Community	Emphasise translating research into practice	Enable a local Research and Innovation Precinct
• Facilitate opportunities for working with academic, research and clinical trial partners through appointment of staff with dedicated time for research and clinical trials as part of their role description, at a level that will increase research in the organisation. • Increase conjoint appointments across the clinical professions with the academic partners in the Far North and elsewhere. • Facilitate research and clinical trials partnerships and collaborations with First Nations research. • Be proactive in leading collaborative research and clinical trials with our strategic, academic, and professional partners to improve health outcomes in the tropical north of Australia.	• Build on partnerships with the Tropical Australian Academic Health Centre (TAAHC), such as the Study Design, Epidemiology and Biostatistics Support Service (SEBSS). • The provision of academic support through conjoint appointments, research fellowships and support structures throughout the organisation. • Increase the educational and training opportunities for prospective researchers and clinical trial specialists. • Increase and improve organisational research and clinical trial capacity, with a focus on the Aboriginal and Torres Strait Islander workforce. • Leverage the digital hospital to improve data set collection. • Showcase research and clinical trials from across the CHHHS. • Promote interprofessional research.	• Embrace efficient electronic practice with the establishment of end-to-end electronic preparation and submission to the Human Research Ethics Committee (HREC) and Research Governance Office. • Integrate the ethics and research governance systems to deliver efficiencies. • Establish effective systems to manage multi-annual grants across financial years.	• Implementation of the National Clinical Trials Governance Framework (NCTGF). • Establish an academic community to lead, promote and supervise research and education fellowships and postgraduate students. • Consolidate research and attract further expertise to develop a suite of Centres of Excellence, initially in the four research priority areas. • Develop interprofessional and cross-disciplinary research networks across preventative and clinical service streams. • Build on the capability and capacity of the Tropical Australia Academic Health Centre (TAAHC). • Increase clinical trial and research capacity in rural facilities. • Attract additional funding from the Far North Queensland Hospital Foundation, and internal and external grants. • Increase clinical trials and research visibility throughout the CHHHS and highlight research and clinical trial achievements.	• Increase community co-design, participation and evaluation of clinical trials and research. • Ensure governance of research through community/consumer members on the Human Research Ethics Committee (HREC) and Research Governance Committee. • Explore and examine the establishment of an Aboriginal and Torres Strait Islander review group.	• Statewide, national and international dissemination of locally developed, evidence-driven models of care and research. • Develop a suite of research and clinical trial training opportunities and mentoring/support networks to encourage the next generation of thought leaders. • Host interprofessional research and clinical trial symposia and acknowledge translation into practice. • Promote the Clinical Trials Research Unit to attract more industry-sponsored clinical trials and competitive research funding.	• Establish a physical research, clinical trials and education facility close to the Cairns Hospital with collaborative space for our partners. • Support clinical trials and research on the conditions that matter to our Far North communities, including translational research, supporting evidence to practice. • Create resources to build knowledge and understanding of our unique tropical health environment to attract and retain our clinician researchers and clinical trial specialists.

Cairns and Hinterland Hospital and Health Service
